

DATA SCIENCE V1.0

Lesson 5

Classic ML End-to-End Project

Objective
Build a full ML pipeline from scratch.

Requirements
- Problem definition
- Data cleaning
- Feature engineering
- Model training
- Evaluation
- Save model
- Create inference script
- API wrapper (reuse Week 1 knowledge)

Suggested Projects

- Fraud detection
- Credit risk scoring
- Salary prediction
- Customer lifetime value

Evaluation

- Architecture clarity
- Code quality
- Model justification
- Business translation
- Debugging skills
